

Flashing Guides

Here you will find our flashing guides for the Raspberry Pi and x86_64/ARM (most desktops, laptops, mini PCs, servers, etc) architectures. Librem Mini owners can use the firmware flashing guide to get StartOS-specific firmware if told to do so by a Start9 Support Technician.

StartOS

Download the latest version of StartOS to flash to a USB thumb drive (x86/ARM) or to a microSD card (Raspberry Pi)

- [StartOS \(Raspberry Pi\)](#) (os-pi.html)
- [StartOS \(x86/ARM\)](#) (os-x86.html)

Firmware only

Download just the firmware (Server Pure only)

- [Firmware \(Server Pure only\)](#) (firmware-pure.html)

Appreciate what we're doing? Please consider a [donation to Start9](#) .
