

# FREE THE INTERNET. WITH THE MULLVAD BROWSER.

When you visit a website, you can be identified and tracked through your IP address, third-party cookies, all kinds of tracking scripts, and through so called browser fingerprints. That's why masking your IP address is not enough to stop the data collection. However, by using a trustworthy VPN in combination with a privacy-focused browser, you can put up a better resistance against the mass surveillance of today. That's why we partnered with the Tor Project to develop Mullvad Browser – a browser designed to minimize tracking and fingerprints.

DOWNLOAD MULLVAD  
BROWSER

The Mullvad Browser is open source and free of charge, whether or not you are a Mullvad VPN user.

Don't forget: your IP address is used to collect data. Use the Mullvad Browser together with a trustworthy VPN.

## A VPN is not enough. This is why you need a privacy-focused browser.

Big tech, authorities, and data brokers can use your IP address, cookies, scripts, and browser fingerprints to identify and track you online. Learn more about your unwanted followers and why you need a privacy-focused browser to stop them.

## A Tor-developed browser. To run with a VPN instead of the Tor Network.

Using a VPN alone is not enough to achieve perfect privacy. There's simply too much data being extracted through most browsers. So, Mullvad reached out to the experts on privacy-focused browsers: the Tor Project. Learn about the idea behind the collaboration.

## Your browser in itself can be a privacy problem. Things to look for when choosing a browser.

Some browsers are made to map your internet behavior. That's their business model. Others just don't have enough privacy protection. These are the questions you should ask yourself (or even better, the browser provider) before you choose a browser.

## Your browser can be used to uniquely identify you. Get to know browser fingerprinting.

When you visit a webpage, most browsers give away information about your software and device. Combining this information with your other browser data makes it possible to create a user profile that can identify you.
